User Guide

We have all csv file, p_test.ipnb and Final_Indeed.ipnb

Download google drive collaboration.

If you want to get the latest data, Run p_test.ipnb (Runtime all) on google drive. Giving a new name

```
final_job_list.to_csv('new_name_integer.csv')
```

In order to get the suggested salary, drag all csv file on left. Run Final_Indeed.ipnb on google drive. At last of the page, enter company location, competitve company name which on the list and level of the job. [junior 1, intermediate 2, senior 3, else normal 0]

After finishing tying, you can get the suggested salary given.

It is not for suggestion. There are a lot other factors is not included. For example, the working time, vacation days, working environment and other elements.
